

Project HVAC IFB #Transit 2022-06

ADDENDUM #1

No Triangle Tube Boilers will be accepted as a substitution for the boiler.

I am an equipment supplier of hydronic/HVAC systems and would like to quote Triangle Tube boilers on the subject job.

That is why we are respectfully requesting to be listed as an approved manufacturer for B-1~2 with a Triangle Tube Prestige PA-250.

Thank you for reaching out regarding your product. After careful review and also with discussions with my client and their staff, I regret to inform you that your substitution request for the Triangle Tube Boilers as an acceptable boiler has been denied.

Thank you,

Jessica Taylor
